Command Sourcing is proud to provide a solution to reduce your risk by helping with your compliance strategy. We achieve this through various tools and software to automate your processes. The BasicSafe Action Management Module prov ides a means of tracking actions issued automatically or manually, a system for recording audits, a job safety analysis, lock out tag out, an incident reporting system and other OSHA compliance services. Another tool we recommend is NoteActive their software takes information that is traditionally hand-written with pen and paper log books and digitizes it in an electronic format on to mobile devices that advances the speed of workplace communication and information capture, sharing and search in real-time.Request more information or a quote today!
