Command Sourcing is proud to offer the iMarksman line-up and virtual target system. This is a cost-effective firearm simulator for Law Enforcement. Getting the proper training is critical in Law Enforcement and can mean the difference between life or death for officers, deputies and the general public. It also

insures their departments can provide the best service to their communities, keep residents safe and attract top-notch talent. This system helps to train officers in making decisions on when to shoot and how long to shoot to eliminate a threat. There is also a Firearm Qualification Course that

will allow a firearm instructor to convert any classroom in your administrative building into a firearm simulator class. With this system you can practice with our own firearms. Our Dry-fire laser devices will fit handguns and rifles from .22 up to .50 and 12G shotguns.
